

Prioritizing SPS investments in the Caribbean using the P-IMA tool

CARICOM Countries face many competing demands to improve their capacity to comply with sanitary and phytosanitary (SPS) requirements to unlock and boost trade, while resources are limited. The purpose of this PPG is to pilot the virtual training of up to ten P-IMA facilitators that will support the virtual/hybrid application of P-IMA to use evidence to prioritize SPS investments in the CARICOM region and the development of action plans and collaborative project proposals that build on informed SPS investment priorities.

The PPG will also support the trained facilitators to apply the P-IMA framework either in the in-country or regional context and develop bankable project proposals that will build on the prioritized actions identified by the P-IMA framework.

STDF/PPG/733

Status

On-going

Start Date

01/05/2021

Project Value (US\$)

\$28,000

STDF Contribution (US\$)

\$28,000

Beneficiaries

Belize
Dominica
Guyana
Jamaica
Suriname
St Lucia

Implementing Entities

Spencer Henson

Partners

Caribbean Agricultural Health and Food Safety Agency (CAHFSA)
Bahamas Agricultural Food Safety Authority (BAHFSA)
Belize Agricultural Health Authority (BAHA)
Inter-American Institute for Cooperation on Agriculture (IICA)

Results

The formal sessions of the virtual training ended in July 2021. Click the links below to watch the recordings.
