Prioritizing SPS Investments in Bangladesh

The purpose of this project preparation grant (PPG) is to apply the STDF Prioritizing SPS Investments for Market Access (PIMA) framework in Bangladesh to develop a scalable and collaborative project proposal based on economic evidence and data, targeting SPS investments in key sectors with untapped export potential, including horticulture and fisheries. The resulting project is expected to support SPS capacity building in the country, help build awareness among the public and private sectors about the returns on SPS capacity building, and support fundraising for capacity building activities.

STDF/PPG/831

Status
On-going

Project Value (US$)
$49,995
