COLEACP

Inter-Professional Association
Established 1973

PIP Programme

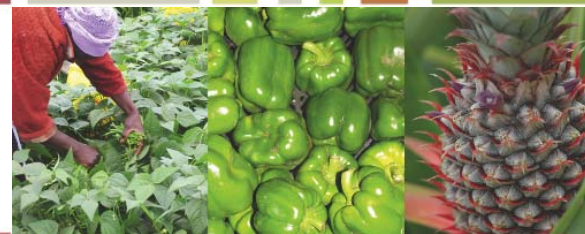

- Technical assistance to the **ACP horticultural industry**
- Facilitating market access by **supporting compliance**
- **32.5 Million €** over 5 years (from October 2009)

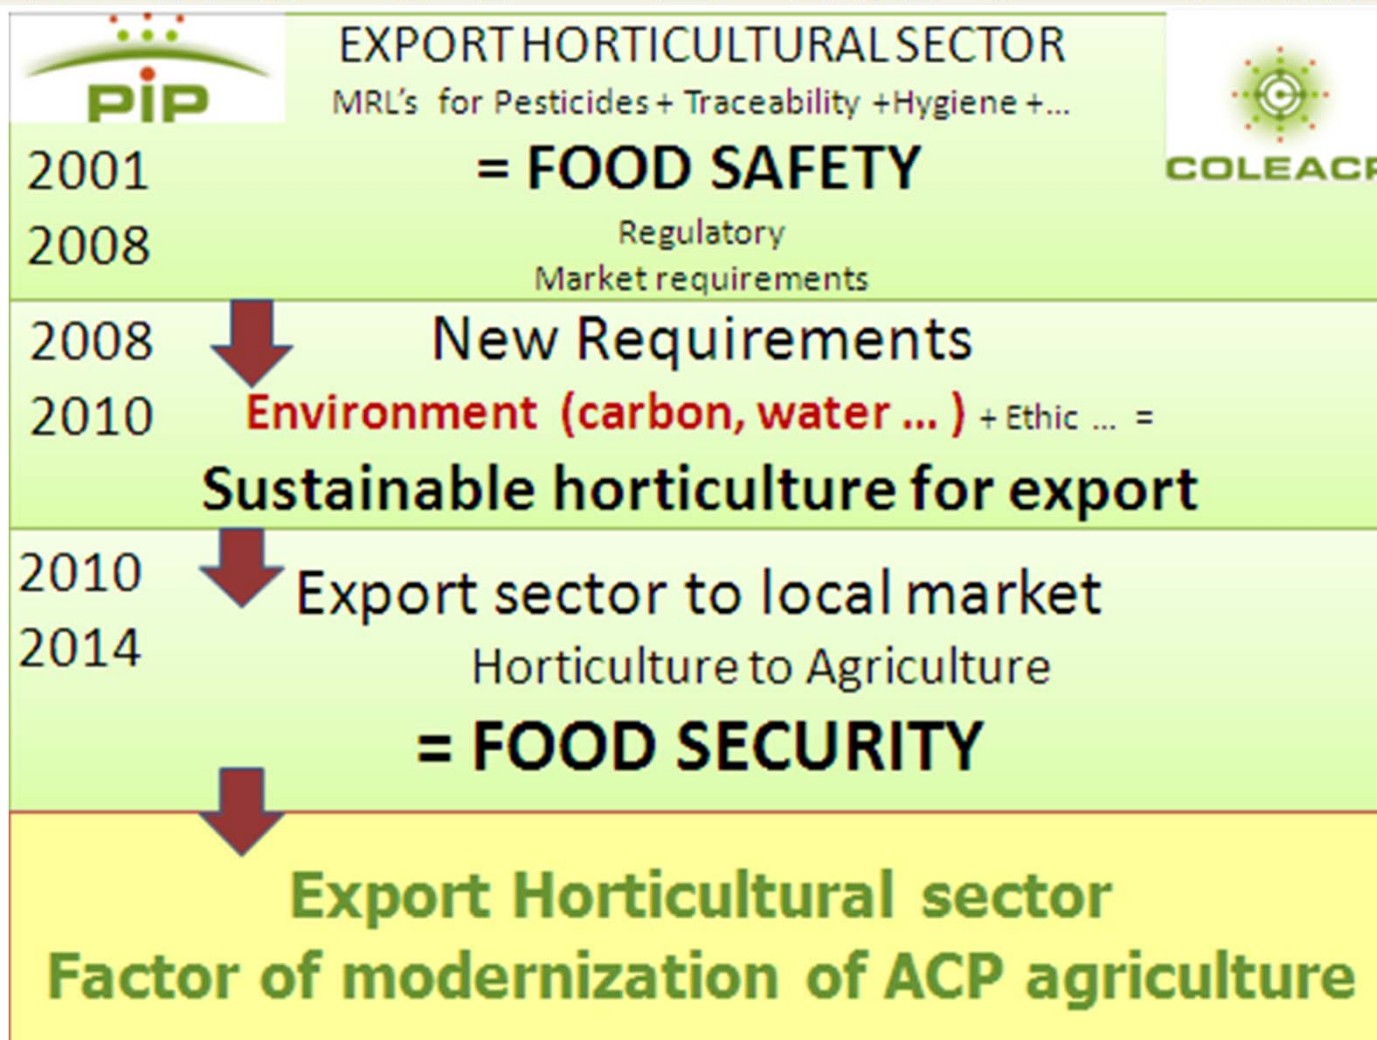

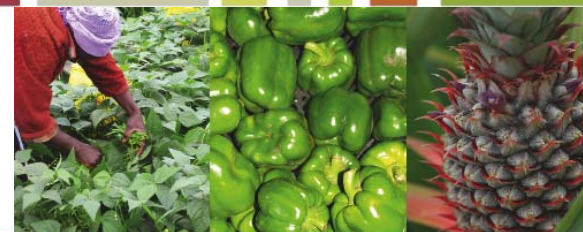

30+ countries; 500+ action plans; 300+ companies;
1,000,000+ smallholders; 88% ACP-EU export flow

Goals

1. Maintain / increase contribution made by export horticulture to poverty alleviation in ACP countries
2. Prevent any negative effect of changing EU regulatory & market requirements on ACP exports
3. Safeguard the position of ACP smallholders
4. Disseminate benefits to local & regional markets

Evolution

The Challenge

- **EU market access requirements:**
 - **EU Regulations**
 - **Private Standards**
- **Technical and financial challenges**

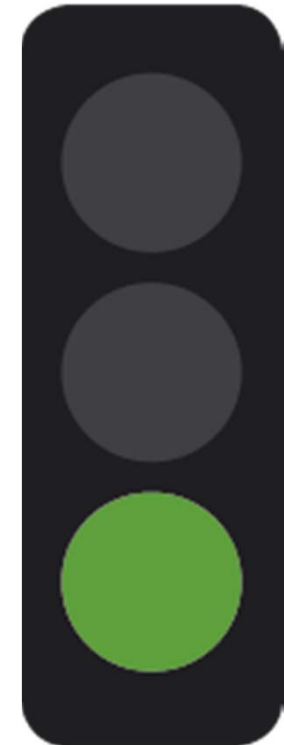

Our Approach

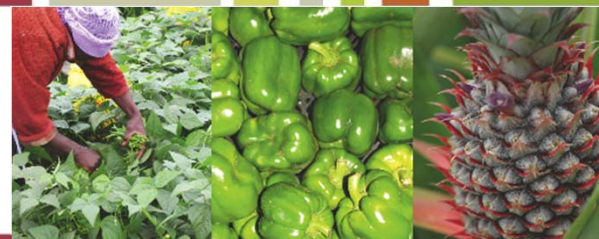

Identify the barriers

Reduce the barriers

Overcome the barriers

PIP Actions

- R&D to ensure producers have the technologies & technical recommendations needed
- Capacity building to ensure supply chain operators have the necessary knowledge and skills
- Facilitating networking, and providing stakeholders with access to up-to-date information

Value Chain Focus

EDES interventions in ACP COUNTRIES – Oct. 2012

• Objectives

- SPS systems OK for EU in countries of origin (principle of equivalence)
- Support ACP countries in reinforcement their national /regional food safety system (growing demand for national systems)

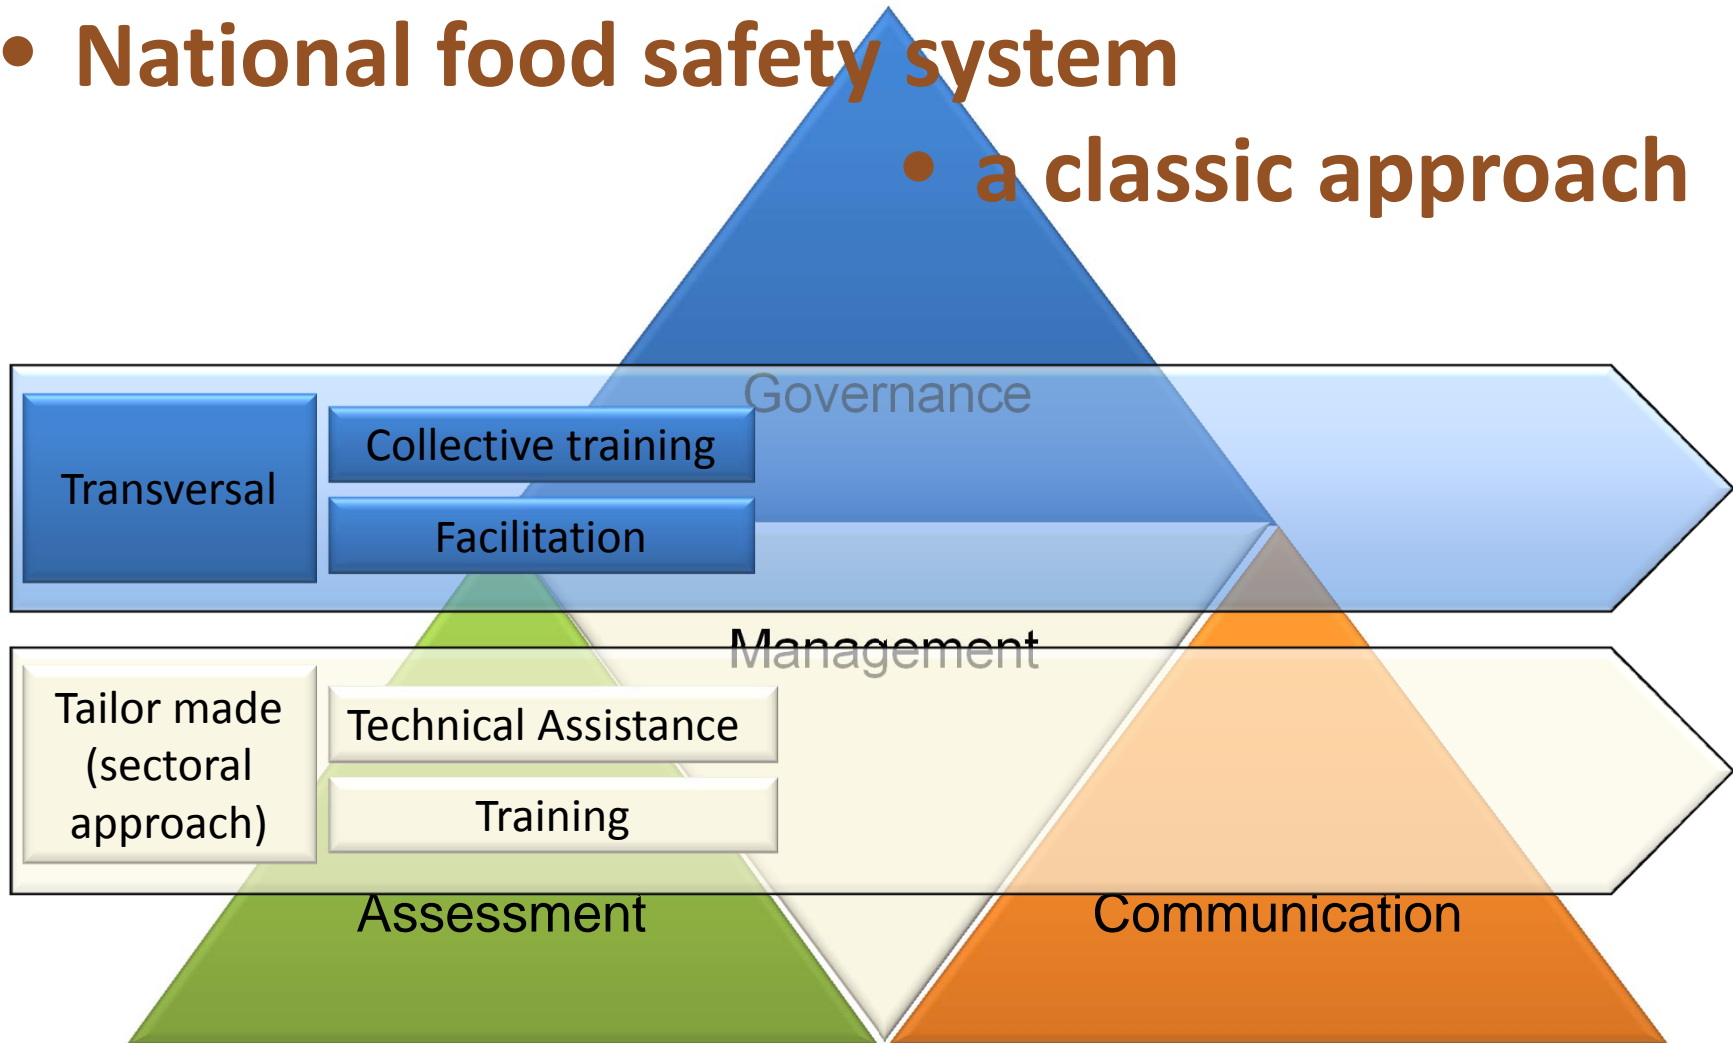

Means

-  Assist implementation of a Food Safety Policy
-  Support implementation of risk assessment (where requested)
-  Enhance risk management (controls, labs)
-  Set up tailored, sustainable and economically viable systems
-  Build a scalable system in order to adapt to new problems in the long term (e.g. reassess self assessment guides along with regulations changes)

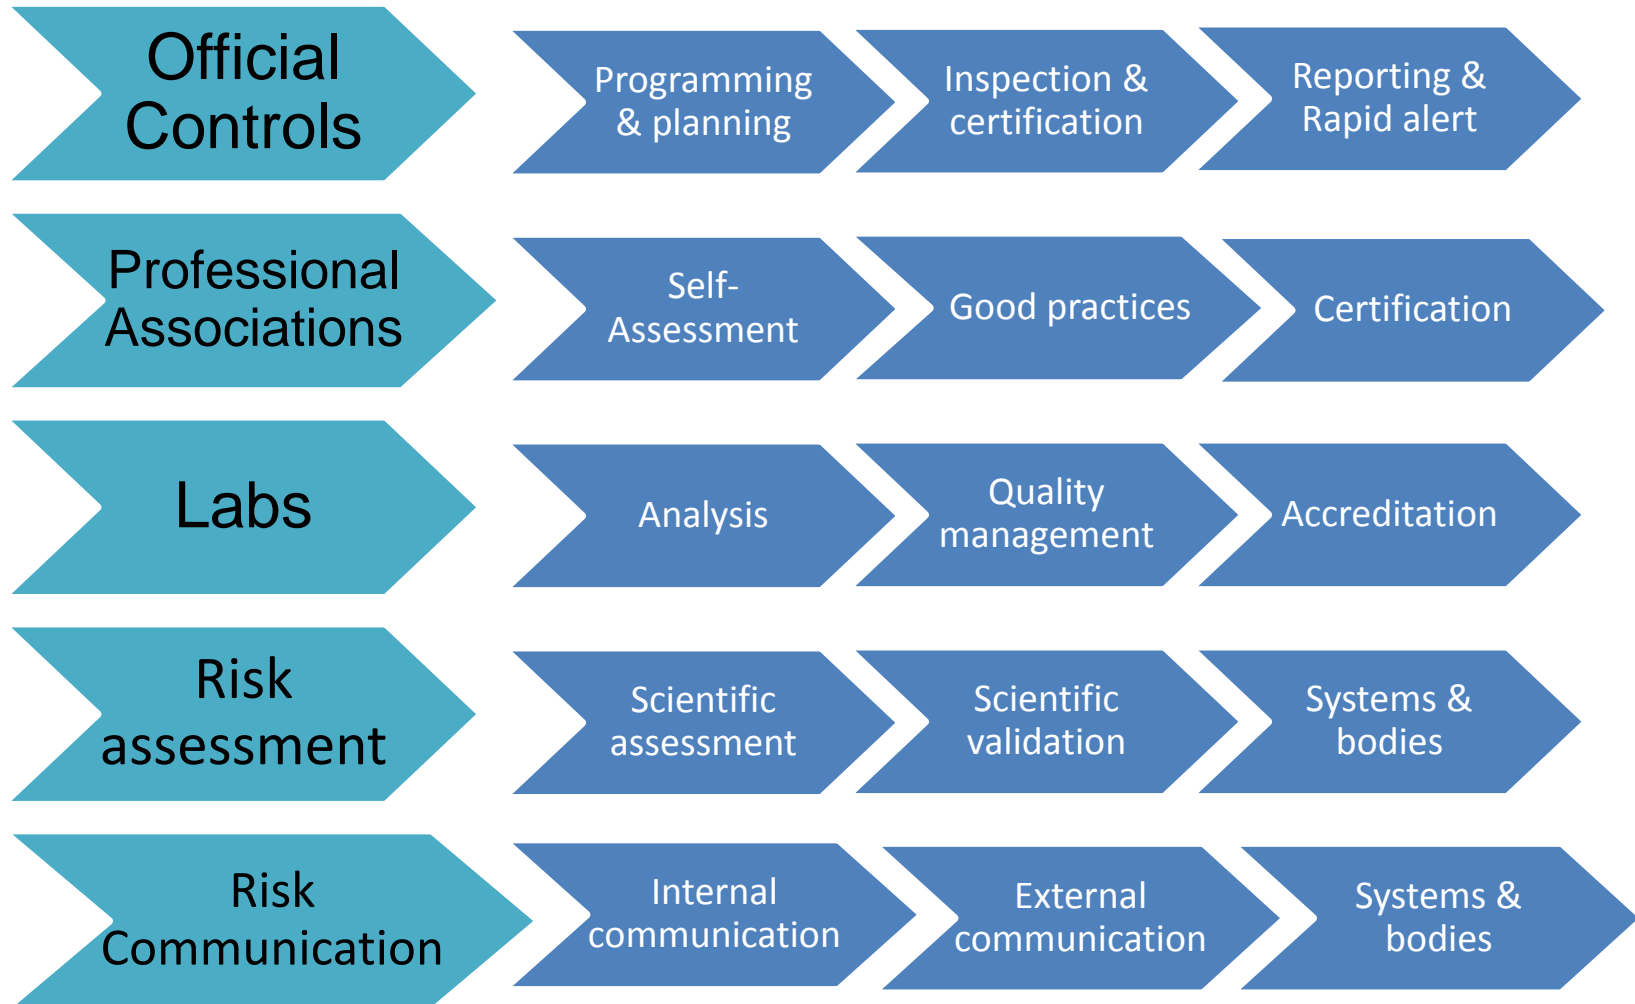

- Lead by COLEACP, CONSORTIUM with :
 - French food safety agency (**ANSES**)
 - French research center in agronomy for development (**CIRAD**,)
 - Danish technical university/food (**DTU**)
 - French school of veterinary services(**ENSV**)
 - French directorate general for food (**DGAL**)
 - Food and Environment Research Agency (**FERA**, UK)
 - France Vétérinaire International (**FVI**)
 - Natural Resources Institute (**NRI**, UK)

Budget 30 million Euros - 4 years (2010-2014)
Funded by EU on behalf of the ACP States Group

- **National food safety system**
 - **a classic approach**

- **A bit more details...**

Logical framework : Expected results from EDES = 4 key dimensions to manage

GOVERNANCE SYSTEMS

Gaps are identified, and risk-based animal health, plant health and food safety systems are strengthened in line with Regulation (EC) No 882/2004 and effectively coordinated in consultation with stakeholders

OPERATIONAL PROCESSES

Food and feed inspection services operate efficiently, effectively, independently and transparently to carry out acceptable controls, according to EU standards

Technically competent and sustainable laboratory services are supported to be available at national or regional level to provide efficient, effective and economically viable food testing to official and industry clients, applying principles of accreditation

Management of change process

MANAGEMENT OF SKILLS

Strengthened local capacity and expertise to provide training and advisory services in food safety and control systems, with emphasis on services to small-scale producers, processors and exporters

COMMUNICATION AND RELATIONSHIP DYNAMICS

ACP stakeholders are informed of EU requirements and of the EU Food Regulations and approaches to respond to them

Training Delivery

- **Training the Trainers**
 - Specialist knowledge and skills
 - Enhancing communication and teaching skills
 - Private and public sector service providers
- **Collective Training Sessions**
 - Delivered by local master trainers
 - Ready-to-use course modules & tools
 - Increases efficiency, reduces cost, standardises key messages

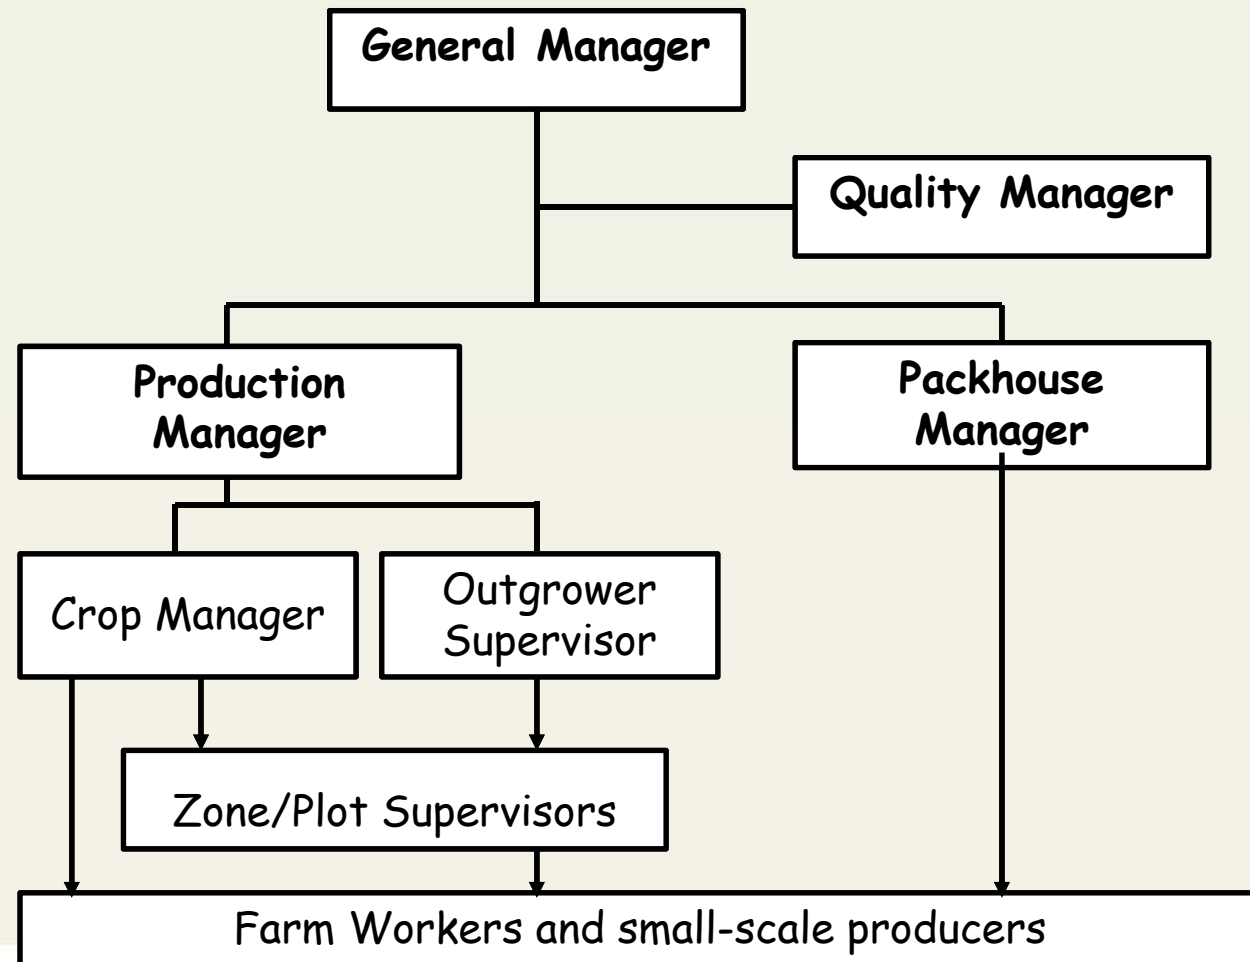

In-House Training

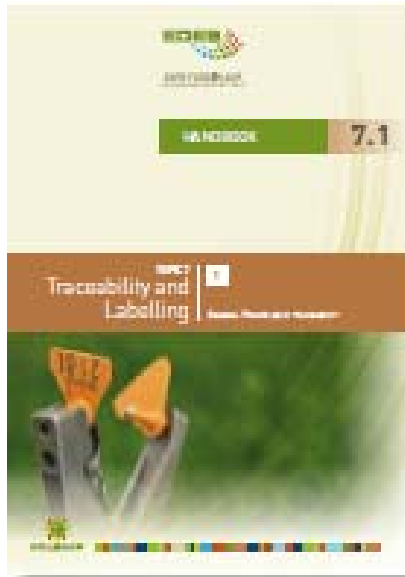

PIP Example

Aim for change in behaviour and mindset

Takes time...
